## Portfolio Allocation

## Maturity Profile

## Risk

## CDBF Advantage

Credit Quality	CDBF portfolio is invested in SL Government backed USD Sovereign Bonds & SLDBs.
Interest Rate Volatility	Given the long term nature of the bonds, they are valued on a "marked-to-market" basis and is exposed to interest rate volatility. Both Sri Lankan and global economic factors affect interest rates impacting the bond portfolio value. Currently, the interest rates are at a peak level and this risk is minimal.
Liquidity (ability to withdraw)	70%+ of the fund portfolio is listed on the Singapore Stock Exchange, which has an active secondary market that enables investors to withdraw their investment at any time.

Past performance is not an indicator of future performance. Investors should carefully consider the investment objectives risks and charges of the fund before investing.. An information memorandum of the fund can be downloaded from the website [www.ceylonam.com](http://www.ceylonam.com).
